Install Jetcam

JetCam is an easy-to-use Python camera interface for the NVIDIA Jetson. Use the [Accelerated GStreamer plugin for Jetson](#) to work with a variety of USB and CSI cameras. Easily read images as numpy arrays

image = camera.read(). Set the camera to running = True to attach callbacks to new frames. JetCam makes it easy to prototype AI projects in Python.

Next, start installing:

```
git clone https://github.com/NVIDIA-AI-IOT/jetcam
cd jetcam
sudo python3 setup.py install
```

Detailed usage and functions can be viewed at https://github.com/NVIDIA-AI-IOT/jetcam
